Question 1

Question 2

Question 3

Connecticut
D.C
Massachusetts
New York
Rhode Island

Question 4

Georgia Missouri

North Carolina

North Dakota

Tennessee

Question 5

One significant trend to observe is that the bottom five states cigarette prices is not as substantial as the magnitude of the increase in cigarette prices for the 5 states with the highest price raises. The bottom 5 states with the lowest price increases generally demonstrated more stable trends in sales per capita. Although there were fluctuations, the overall trend tended to be less pronounced compared to states with higher price increases.

Question 6

The estimated price elasticity of demand for cigarettes from 1970 to 1990 is approximately -0.81. The demand for cigarettes during this period is relatively inelastic, suggesting that changes in price have a limited impact on quantity demanded.

Question 7

```
TSLS estimation, Dep. Var.: log(sales_per_capita), Endo.: log(price_cpi), Instr.: log(total_
Second stage: Dep. Var.: log(sales_per_capita)
Observations: 1,071
Standard-errors: IID
              Estimate Std. Error  t value  Pr(>|t|)
(Intercept)      5.375575   0.050825 105.7659 < 2.2e-16 ***
fit_log(price_cpi) -0.795524   0.071235 -11.1676 < 2.2e-16 ***
---
Signif. codes:  0 '***' 0.001 '**' 0.01 '*' 0.05 '.' 0.1 ' ' 1
RMSE: 0.189226  Adj. R2: 0.293235
F-test (1st stage), log(price_cpi): stat = 436.8      , p < 2.2e-16 , on 1 and 1,069 DoF.
Wu-Hausman: stat = 0.053709, p = 0.816775, on 1 and 1,068 DoF.
```

The estimated price elasticity of demand for cigarettes from 1970 to 1990 using an instrument (total cigarette tax) for log prices is approximately -0.79. The estimate is not significantly different from the estimate in question 6. But as you can see from the table, the R2 is low so this may indicate that the IV is not strongly correlated with the endogenous variable.

Question 8

Call:

```
lm(formula = log(price_cpi) ~ log(total_tax_cpi_2022), data = subset_data)
```

Residuals:

Min	1Q	Median	3Q	Max
-0.23046	-0.09207	-0.02919	0.08019	0.48675

Coefficients:

	Estimate	Std. Error	t value	Pr(> t)
(Intercept)	0.787829	0.005421	145.3	<2e-16 ***
log(total_tax_cpi_2022)	0.260060	0.012443	20.9	<2e-16 ***

Signif. codes: 0 '***' 0.001 '**' 0.01 '*' 0.05 '.' 0.1 ' ' 1

Residual standard error: 0.1272 on 1069 degrees of freedom

Multiple R-squared: 0.2901, Adjusted R-squared: 0.2894

F-statistic: 436.8 on 1 and 1069 DF, p-value: < 2.2e-16

Call:

```
lm(formula = log(sales_per_capita) ~ pricehat, data = subset_data)
```

Residuals:

Min	1Q	Median	3Q	Max
-0.86239	-0.09798	0.00549	0.09359	0.95094

Coefficients:

	Estimate	Std. Error	t value	Pr(> t)
(Intercept)	5.37557	0.05794	92.779	<2e-16 ***
pricehat	-0.79552	0.08121	-9.796	<2e-16 ***

Signif. codes: 0 '***' 0.001 '**' 0.01 '*' 0.05 '.' 0.1 ' ' 1

Residual standard error: 0.2159 on 1069 degrees of freedom

Multiple R-squared: 0.08238, Adjusted R-squared: 0.08152

F-statistic: 95.97 on 1 and 1069 DF, p-value: < 2.2e-16

Question 9

The estimated price elasticity of demand for cigarettes from 1970 to 1990 is approximately -0.9968

The estimated price elasticity of demand for cigarettes from 1991 to 2015 using an instrument (total cigarette tax) for log prices is approximately -1.15.

The estimated price elasticity of demand for cigarettes from 1970 to 1990 is approximately -0.9968

```
TSLS estimation, Dep. Var.: log(sales_per_capita), Endo.: log(price_cpi), Instr.: log(total_tax_cpi_2022)
Second stage: Dep. Var.: log(sales_per_capita)
Observations: 1,275
Standard-errors: IID
              Estimate Std. Error   t value   Pr(>|t|)
(Intercept)      5.82027    0.039371  147.8322 < 2.2e-16 ***

```

Question 10

The elasticity estimate for the period 1970-1990 was approximately -0.81, whereas for the period 1991-2015, it was approximately -0.99.

The difference in elasticity estimates could be attributed to changes in consumer behavior, regulatory policies, and socio-economic conditions. For example, increased awareness of health risks associated with smoking could have made consumers more sensitive to price changes in later years. Please see the table below for the data in the table for easier viewing and comparison.

	Period	Price_Elasticity	IV_Elasticity	First_Stage_R2
log(price_cpi)	1970-1990	-0.9968136	-0.7955235	0.2901006
log(price_cpi)1	1991-2015	-0.9968136	-1.1500837	0.8121467
	Reduced_Form_R2			
log(price_cpi)		0.0823776		
log(price_cpi)1		0.6069778
